Material facts

There are no material facts about the securities being distributed that have not been disclosed in this Offering Document or in any other document filed by the Company in the 12 months preceding the date of this Offering Document.

What are the business objectives that we expect to accomplish using the available funds?

The Company intends to use the gross proceeds from the sale of FT Shares to incur Qualifying Expenditures related to the Company’s projects near Chibougamau, Québec, on or before December 31, 2025. This includes programs and expenditures to proceed with summer and winter exploration programs, including diamond drilling, IP survey, mapping and trenching, on the following projects: Philibert, Lac Surprise, Chevrier and Croteau. The Philibert project is expected to be the main focus of those exploration programs and the Company intends to update the Technical Report on the Philibert project based on the results of such exploration work.

The Company intends to use the net proceeds from the sale of HD Shares for working capital and general corporate purposes over a period of 12 months following closing of the Offering.

USE OF AVAILABLE FUNDS

What will our available funds be upon the closing of the Offering?

The expected total available funds to the Company following completion of the Offering is estimated to be \$8,795,117.

The above noted allocation of capital and anticipated timing represent the Company's current intentions based upon its present plans and business condition, which could change in the future as its plans and business conditions evolve. Although the Company intends to spend the proceeds from the Offering as set forth above, there may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary materially from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including the Company's ability to execute on its business plan. See the "Cautionary Statement Regarding Forward-Looking Information" section above.

The most recent audited annual financial statements of the Company included a going-concern note. The Company is in the process of exploring its mineral properties and has not yet determined whether these properties contain mineral reserves that are economically recoverable. The recoverability of exploration and evaluation expenditures is dependent upon the establishment of a sufficient quantity of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production or proceeds from the disposition of these assets. The Company's ability to continue as a going concern is dependent upon its ability to obtain the financing necessary to fund its mineral properties through the issuance of share capital, and to realize future profitable production or proceeds from the disposition of its mineral interests. These material uncertainties cast significant doubt about the Company's ability to continue as a going concern. The Offering is intended to permit the Company to continue to explore its properties and conduct additional drilling with the goal of defining mineral resource estimates, and is not expected to affect the decision to include a going-concern note in the next financial statements of the Company.

How have we used the other funds we have raised in the past 12 months?

The Company has not raised any funds in the past 12 months.

FEES AND COMMISSIONS

Who are the dealers or finders that we have engaged in connection with the Offering, if any, and what are their fees?

Underwriter:	Cormark Securities Inc.
Compensation Type:	Cash fee equal to 6.0% of the gross proceeds of the Offering.

Does the Underwriter have a conflict of interest?

To the knowledge of the Company, it is not a “related issuer” or “connected issuer” of or to the Underwriter, as such terms are defined in National Instrument 33-105 – *Underwriting Conflicts*.
